figure8

Simplify your software implementation and upgrade process with Figure8's test automation services and the TheTestMart's advanced automated AI technology.

EXPERIENCE FIGURE8'S CONTINUOUS RELEASE MANAGEMENT SERVICE POWERED BY THETESTMART

OVERVIEW

Just like taking your car to the mechanic, most people don't inspect their own vehicle, it's too complicated and they don't have the equipment or specialised knowledge in house. So they take it to a service station and leave it to the professionals.

With Figure8 you can think of us like a service station for software upgrades. We test your business application on a regular basis to ensure each release is functioning as expected, then we give you the results so that you can upgrade with confidence.

OUR OFFERING

At Figure8 we offer a cost-effective managed testing service using TheTestMart's powerful AI driven robotic process automation engine to manage your testing needs.

We work with you, to create a customised test plan that caters to your unique requirements. This ensures minimal disruption during implementation and upgrades, enabling your team to focus on their crucial day-to-day responsibilities.

AT A GLANCE

We Provide

- Pre-built test libraries
- Onboarding
- Auto-generated documentation
- Release management
- Test planning
- Test configuration
- Reporting
- Training Documentation
- Functional Testing
- Regression Testing

Benefits

- Increased productivity
- Risk reduction
- Early error warning

"It used to take seven people over a period of two weeks to validate an upgrade. Now we can have one person complete the majority in just a few days"

Emmett Vallender
COO - Città
